Beyond the Sky

```
Em7                    Cmaj7                D                    Am7/G
I hear the music of a traveling song and I think that I should go,
            D
But I don't know.
Cmaj7   Em       D
I don't know.
Em7                      Cmaj7                D                  Am7/G
I've been sitting in one place too long and I hear a clear black sky
           D
Call me to fly.
Cmaj7  Em    D
Off to fly.
  Am7/G           C/G                  Bm              Em
I want to see the things that lie out far beyond the sky.
  Am7/G          D                        G                  Em
I want to stand upon the sand and watch a Martian storm roll by,
   Am7/G             C/G              Bm               Cmaj7
To walk the moons of Jupiter and look down on Saturn's rings,
   Em7                Am7/G                    D                Cmaj7   D
To fly past where the comets dwell and say goodbye to all these things.

I want to fly at FTL on an interstellar run
And then go on.
And then go on.
I want to see the twin moons rise by the light of a triple sun.
We've just begun.
We've just begun.
I want to see if life can thrive beyond the bounds of Earth.
I want to see the lightning strike on an ocean giving birth,
To see the greatest star collapse and ride the supernova's wave
And cruise event horizons of another stellar grave.

     Cmaj7            Am7/G           D
Come fly with me on a trip beyond the stars.
      Cmaj7              Am7/G                    G           Em7
Let's find a ship that's fast enough to cross the universe in hours.
    Am7/G                D
And soon you'll see it's true.
           Cmaj7         Em7      D
I would go anywhere with you.
