LOVE AT FIRST SIGHT

Lyrics and Music © 2004 by Bill Roper

```
Cmaj7             Dm7
Love'll catch you without warning.
Cmaj7                  Dm7
Love'll find you on a sunny morning.
Fmaj7                    G
Or maybe some time on a gray afternoon.
Fmaj7                G            G7
Or even later by the light of the moon.
Cmaj7            Dm7
Love is special, love is grand.
Cmaj7                     Dm7
Love is something I still don't understand,
Fmaj7                      G
But I know there's nothing my love won't do
Fmaj7                      G           G7
Since the day I found that my love was you.

            (Chorus)
                   Cmaj7
            Was it love at first sight?
                      Dm7
            Did you remember both ways?
                     Cmaj7
            A little memory from tomorrow
                     Dm7
            Reaching back for today?
                   Cmaj7
            Was it love at first sight?
                    E7        Am
            Did you try to forget
                      Dm7
            A vagrant memory from a future
                     G
            That had not happened yet
                                 Cmaj7
            In our love at first sight?

Stronger forces set in motion.
Wasn't magic or some number nine potion.
Just a feeling that I needed to know
What it was that set your eyes all a-glow.
I was trying to remember
Things I'd never known before that September.
Sitting, talking there and hoping to find
Things that tickled at the back of my mind.

(Chorus)

            (Bridge)
            Fmaj7                    G
            There's a message from tomorrow
            Fmaj7                     G
            From a love that wants to be.
            Fmaj7            G
            From possible to probable
```

Lyrics and Music © 2004 by Bill Roper

```
            Fmaj7                 G    G7
            To find you here with me.
```

(Chorus)

There is action and reaction
And no way we can deny the attraction.
Sitting, smiling with our heads spinning round.
That kind of love'll turn your life upside down.
I know someday a little thought'll
Drop a message in a temporal bottle.
Send it floating up the current of time,
So we'll know that you will always be mine.

(Chorus twice)

It was love at first sight.
Love at first sight.

*So how **do** you fall in love at first sight? Maybe someone's trying to tell you something...*
