Spin the Planet

(Chorus)

G **C**
Let's spin the planet.
G
Got to get a handle on the world.
C
Let's spin the planet.
D
Let's go out and take her for a whirl.
C
A kaleidoscope of vision
Em
In blue, green, white, and brown
Am7
And we're making a decision
D
That'll turn her upside down.
C **D**
Let's spin the planet.
G
Let's spin the planet.

G **C**
I've got to have the answer, 'cause I've got to make the call,
Am7 **D**
But I'm searching now for wisdom, 'cause I may not know it all.
C
You look at any mother's son,
A7
I'm twice as smart as anyone
G **D**
And everyone could be a lot like me.
C
But there's a chance I might surmise
A7
To pull that trigger isn't wise.
D
I've got the itch to let her rip and see.

I just need some perspective, some help to ease my load
'Cause all my thoughts are spinning since I learned to crack the code:
Embedded in the DNA,
Resect and watch it run away
And open up your mind and let it soar.
I'm better, smarter than I was,
But smarter is as smarter does.
Don't know if I should do this any more.

I started with a virus that was tailored just for me,
But now that I am smarter, I know how to set it free.
Infectious now to every man,
Set genius leaping hand to hand
To try to make the world a better place.
So look at me with normal eyes
And tell me if I'm being wise
And if we'll get a better human race.

(Chorus twice)

Let's spin the planet.
Let's spin the planet.
Let's spin the planet.
